# INDIVIDUAL CONTACTS OVER THE COURSE OF THREE WEEKS

Data were collected on interactions, digital and in-person, from October 8th through October 28th. Approximately, 75 hours of interactions were logged and categorized. Digital logs were reviewed to collect digital data such as text, calls, etc. Although I tried to record as many interactions I could muster, it is likely several slipped through the cracks. Nonetheless, the visualization presents a fairly accurate visual documentation of my interactions over the last three weeks.
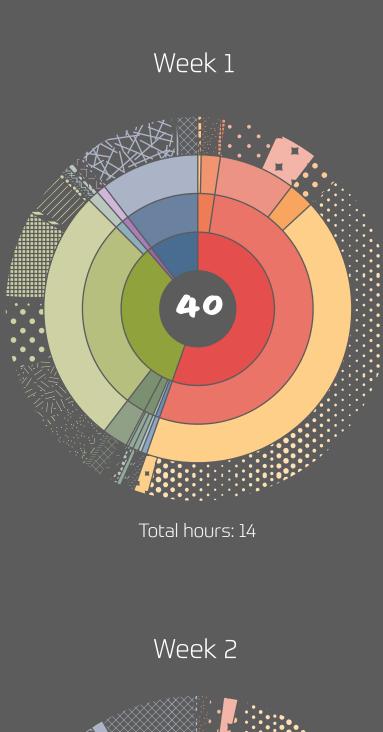

Note: the days have different durations, so absolute comparisions between days are best avoided.

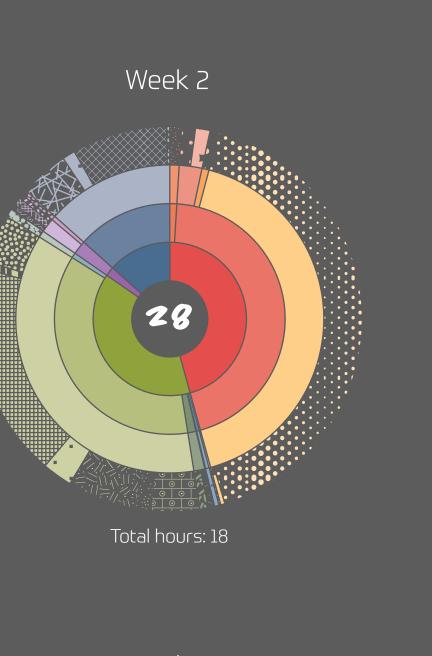

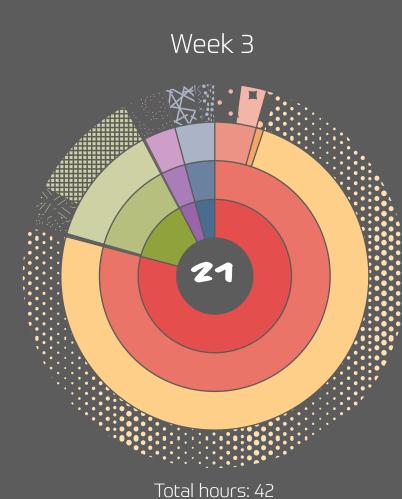

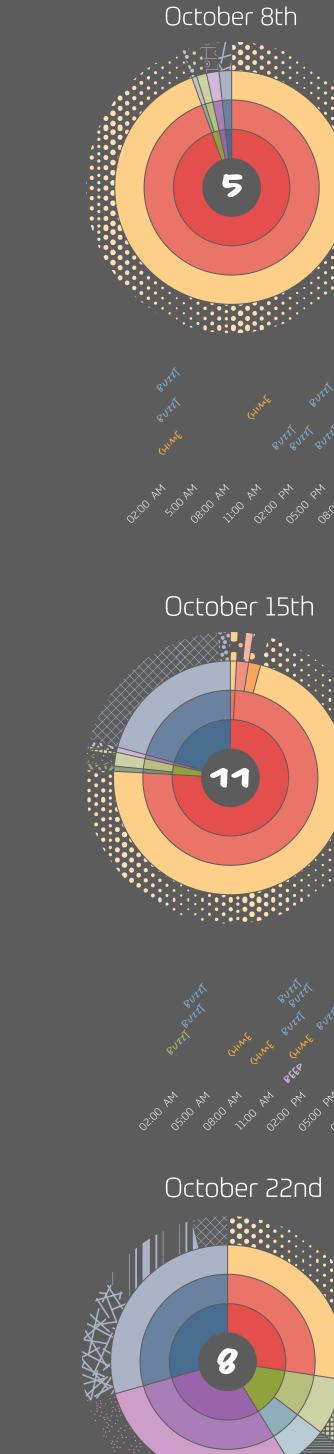

Total # interactions — Group — Connection — Sub-connection — Individual
